

To Whom It May Concern:

I Miss Lopez, the mother of child Aaron Buckley, which is a student at Little People's Place, Inc. would like to express my feelings upon my child attending the school and his experience.

My child has learned a lot of patience and kindness towards other kids his age. He never knew how to get along with other kids, at times I was wondering if he would ever learn. Being at Little People's Place has changed him a lot, and he leans a lot. Now he is talking more at home, he tells me when he has to use the bathroom, which is a great help that they did. He can also count from 1 to 10. To top it off, what made me feel so well pleased is when my child came home and I gave him dinner and he told me "thank you". That touched my heart so much to see that they are teaching them manners, and appreciation for things.

My child has learned and grown a lot at Little People's Place, and I know he will keep on growing there and learning more by the time he is ready for public school. I would give a great reference to anyone on their request at anytime.
