

My name is Melissa Reyes. My son's name is Kevin Tazard. Kevin assist to Little People's Place, Inc. He 's been in the daycare for six months. I like it, so as my son.

All staffs are very nice people, friendly, and also very professional. When I first enroll my son in the daycare, I used to live four blocks away form it, now (recently) I move and is not close anymore, but I prefer to travel an hour and know that my son is in perfect condition. When I am in school or any other place, I feel very comfortable because I know he is in good hands. The other thing that I really like is that my son is 2 years old and is not potty-training and they not only accept him, they also help him (and other children in the daycare) to learn to use the toilet. It is very hard to find a daycare like this; most of the other daycares prefer children that are potty training.

Little People's Place, Inc., is very organized; everything is divided for every section like, the kitchen, bathroom, office, and the children's place. They choose a time for the children to do something, for example when its time for nap, to eat, and story time. They also do a lot of activities like trips; in the summer they take them to the park, or the library, etc. I feel so proud of my son because every time we are in the house he comes out with something different, for example songs, etc. I feel great because my son is learning something new everyday.

The staff has a great communication with the parents, for example when my son is doing something out of the normal; they speak to me and suggest to me what to do to solve that situation to make it better.

I recommend Little People's Place to any parents because they can get all types of good treats for their kids, and I am very satisfy with everything they to for my son.
